

## Call for Posters

The 6<sup>th</sup> International Conference on Recent Achievements in Mechatronics, Automation, Computer Sciences and Robotics (MACRo2017) will be held at [SAPIENTIA University, Faculty of Technical and Human Sciences](#), Tîrgu Mureş on 27-28 October, 2017.

**The MACRo 2017 Organizing Committee invites submissions for Poster Session.**

Some of the submitted full papers might be accepted as a poster presentation, but ***poster papers are also solicited***. The Poster Session will run in parallel with the Industrial Reality Session, located in the University Aula.

Poster presenters will be expected to be present during the Conference in order to explain their poster and to present any supplemental material. Attendees will browse among the posters and speak directly with the presenters. The poster session is intended to be informal, conversational.

### Extended abstracts for posters

Papers submitted for the Poster Session (Deadline: September 10, 2017) must be in the form of a one page extended abstract (formatted according to the paper template).

These extended abstracts will be published in a special section of the Conference Proceedings CD-ROM.

### Size of Poster Materials

The board area for each poster presentation is of **A1 size (portrait orientation)**. The size of poster materials should fit these boards and be readable at a distance of a couple of meters. The paper number will be posted on the board by the organizers.

### Poster Board

It is important that all the graphs and tables shown are clear and legible to avoid readers standing close to the poster and blocking the view from others. Preferably use colors, tables, and graphs, rather than dense paragraphs. Consider organizing the materials logically, so that the attendee can perceive easily the motivation for the work, the methods used, and the results achieved.
